Reasons for Allowance

- 1. Claims 1-21 are allowed.
- 2. The following is an examiner's statement of reasons for allowance:

The cited prior art taken alone or in combination fails to teach the claims invention of tracking printer functional usage, quantitatively establishing frequency of usage of printer functions and through a web server embedded in the printer, accessing training packages related to the usage histogram and presenting such training packages to the user of the printer.

The closest prior art (Gross et al, U.S. Patent 5,555,346) teaches an event-driven rule-based messaging system that is conditional, action-invoking paradigm or "triplet" which facilitates definition of a repertoire of events considered to be significant events upon which to trigger actions in a system such as an electronic mail, messaging system. Gross does not teach a frequency of usage to access the related rule (training package) and cannot offer such training package to the user of the related printer. An alternative prior art (Uner, U.S. Pub. 2002/0184303) teaches an embedded web server capable of managing dynamic content delivery of data stream, audio stream, or video stream. Uner does not teach analysis of the parent system necessary to make the training package recommendation. Another alternative prior art (Howard et al, U.S. Patent 6,601,086) teaches a service provider for providing data, applications and services to embedded devices and for facilitating control and monitoring of embedded devices. In this case, Howard does not teach analysis of printer data required to formulate the histogram that allows printer training package recommendation. Further

Art Unit: 2121

alternative prior art (Venkatraman et al, U.S. Patent 5,956,487; common assignee but published more than one year from the applicant's filing date) teaches embedding web access mechanism in an appliance for user interface functions including a web server and web browser. Venkatraman teaches user interface functions but does not teach analysis of user operations that permit recommendations for a specific printer training package. Consequently, the claimed invention improves the usefulness of the subject printer by offering a tailored training program that can improve the user's ability to use the subject printer.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Correspondence Information

3. Any inquiry concerning this information or related to the subject disclosure should be directed to the Examiner, Joseph P. Hirl, whose telephone number is (571) 272-3685. The Examiner can be reached on Monday – Thursday from 6:00 a.m. to 4:30 p.m.

If attempts to reach the Examiner by telephone are unsuccessful, the Examiner's supervisor, Anthony Knight can be reached at (571) 272-3687.

Any response to this office action should be mailed to:

Art Unit: 2121

Commissioner of Patents and Trademarks,

Washington, D. C. 20231;

or faxed to:

(571) 273-3685 (for formal communications intended for entry with notation of "Formal Entry");

or faxed to:

(571) 273-3685 (for informal or draft communications with notation of "Proposed" or "Draft" for the desk of the Examiner).
